INTERNATIONAL RIGHTS OF NATURE TRIBUNAL

The current ecological crisis requires that we transform our international and domestic legal systems to nurture the Earth Community, rather than allow its destruction. **The International Rights of Nature Tribunal is a unique, citizen-created initiative that gives people from all around the world the opportunity to testify publicly as to the destruction of the Earth. The Tribunal provides a systemic alternative to environmental protection, acknowledging that ecosystems have the right to exist, persist, maintain and regenerate their vital cycles, with legal standing in a court of law. An esteemed panel of international Tribunal judges will make recommendations for Earth's protection and restoration.**
